

# BIOMAS™ Tea. - MAS COTEK (Ficus Deltoidea)

**Mas Cotek (Ficus Deltoidea)** is well known to be found under the Malay archipelago. It is a valuable plant that grows wild in the forest and could reach the height of six feet. Under extensive research and development, today this precious herb is grown in a specially formulated compose contained in a poly bag which yields high quality leaves and fruits.

**BIOMAS™ Tea** is produced from 100% specially selected leaves of 7 different species of Mas Cotek. It is formulated based on traditional preparation and extensive scientific research. These previous herbs have undergone vigorous chemical tests and conform to the International Good Manufacturing Practices (GMP). The leaves are dried under low temperature to preserve its natural properties and maintains its efficacy. It provides you and your family the highest quality health drink.

Beside Tongkat Ali (*Eurycoma Longifolia*) and Kacip Fatimah (*Labisia Pumila*), **Mas Cotek (Ficus Deltoidea)** is the latest highlight in the herbal industry,. It is well-known for its nutrition which is beneficial for prevention various type of disease and good for health maintenance for both men and women.

According to the concept of “Doctrine of signature”, the shape, colour, taste and smell of each of the segment of the plant of Mas Cotek reflects the applications of the herbs for treatment of disease.

For traditional medical practitioner, Mas Cotek is capable of preventing and healing various type of diseases if prescribed accurately. **Mas Cotek has been traditionally used for:**
